Summary

Frontend Developer specializing in React, Next.js and TypeScript, with Full Stack Java training from EBAC and a Bachelor's in Software Engineering in progress. I build responsive web applications from UI to production deploy, using Redux Toolkit and React Query for state management, Vitest, Jest and React Testing Library for automated testing, and GitHub Actions for CI/CD. Based in Brazil (UTC-3), with working hours that overlap US business hours.

Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, React Query (TanStack Query), Material-UI (MUI), Tailwind CSS, Styled Components, Responsive Design, Web Accessibility (a11y, ARIA)
- **Testing & Quality:** Unit Testing, Integration Testing, Vitest, Jest, React Testing Library (RTL), Storybook, ESLint, Prettier
- **Backend & Data:** Node.js, Python, Django, Django REST Framework (DRF), Java, Spring Boot, REST APIs, JSON Web Token (JWT), OAuth, OpenAPI (Swagger), Supabase, PostgreSQL
- **Tools:** Git, GitHub Actions, CI/CD (Continuous Integration/Continuous Deployment), Vercel, Figma

Projects

User Management Dashboard | React, TypeScript, Redux Toolkit, React Query, MUI | Mar 2026 | test-react-five-lake.vercel.app

- Built a full CRUD user management dashboard in 24 hours for a React Junior technical assessment, meeting every required item and all 9 optional items; advanced to the interview stage.
- Implemented global state with Redux Toolkit (createAsyncThunk) and server-state caching with React Query (cache invalidation and refetch).

- Wrote unit and integration tests with Vitest and React Testing Library; configured a GitHub Actions CI/CD pipeline that runs ESLint, tests and build on every push; deployed to Vercel.
- Applied code splitting (React.lazy, Suspense), memoization (useMemo, useCallback, React.memo), a custom Error Boundary, ARIA labels, keyboard navigation and persistent dark mode; documented components in Storybook.

GameTracker | Next.js, TypeScript, Supabase, RAWG API | Apr 2026 | gametracker-livid.vercel.app

- Built a game tracking web app with OAuth authentication, a Supabase database and RAWG API integration; deployed to Vercel.
- Added security headers and route protection with Next.js middleware, and documented environment setup and deployment in the README.

Flix API | Python, Django REST Framework, JWT, OpenAPI | Aug 2025

- Built a RESTful API with CRUD endpoints for movies and actors, JSON Web Token (JWT) authentication and interactive OpenAPI (Swagger) documentation.
- Integrated the API with a Streamlit frontend using AgGrid data tables for create, edit and list operations.

Volunteer Experience

Digital Literacy Workshops | University Extension Project, Anhanguera | Rio das Ostras, RJ

- Designed and taught six progressive digital literacy workshops for a community association, based on a diagnostic survey of 30 residents; 24 of 27 enrolled participants completed the program.
- Coordinated space, equipment and schedule with the association's board; email usage among participants rose from 22% to 96%, and two participants volunteered to continue the workshops.

Education

- Bachelor of Science in Software Engineering | Anhanguera | 2025 - 2029 (expected)
- Full Stack Java Developer Program | EBAC | Oct 2024
- Courses: Artificial Intelligence (EBAC); Django Master, AI Master, Docker (PycodeBR)

Languages

Portuguese (Native) | English (Intermediate)
