SUMMARY

Junior Full Stack Developer who builds complete web applications, from the database and REST API to the UI and deploy. On the front end I use React, Next.js and TypeScript with Redux Toolkit, React Query and automated tests. On the back end I build APIs with Django REST Framework and Node.js/Express, JWT and OAuth authentication, and PostgreSQL (Supabase) and MySQL databases. Graduate of EBAC's Full Stack Java Developer program, currently studying Software Engineering at Anhanguera.

TECHNICAL SKILLS

Front end: React, Next.js (App Router), TypeScript, JavaScript (ES6+), Redux Toolkit, React Query, Tailwind CSS, Material-UI, Styled Components, React Hook Form, Yup

Back end: Node.js, Express, Python, Django, Django REST Framework, Java, Spring Boot, REST APIs, JWT, OAuth, OpenAPI (Swagger)

Databases: PostgreSQL (Supabase, Row Level Security), MySQL, SQLite, Firebase Firestore, SQL

Testing & DevOps: Jest, Vitest, React Testing Library, Storybook, ESLint, GitHub Actions (CI/CD), Git, Vercel

PROJECTS

GameTracker

2026 · gametracker-livid.vercel.app

Next.js, TypeScript, Supabase (PostgreSQL + Auth), Tailwind CSS, Jest, GitHub Actions

- Full stack app for cataloguing games: OAuth sign-in (Google, Discord and GitHub) with Supabase Auth and a personal library stored in PostgreSQL with Row Level Security.
- Server-side RAWG API integration (API key never reaches the client), OAuth callback in a route handler, middleware-protected routes and security headers.
- Unit tests with Jest and a GitHub Actions CI pipeline (lint, typecheck, tests and build); deployed on Vercel.

SGE · Inventory Management System

2025 · github.com/Jportov/sge

Python, Django, Django REST Framework, JWT, Pandas

- Web inventory system for products, suppliers, brands and categories; purchases and sales update stock automatically through Django signals.
- Dashboard with KPIs (stock value, profit margin, last 7 days of sales) computed with Pandas; REST API with JWT authentication and per-module permissions.

Customer Registry

2025 · github.com/Jportov/cadastroclientev2

React, Node.js, Express, MySQL, React Hook Form, Yup

- Full CRUD with a REST API in Express and MySQL, unique tax ID (CPF/CNPJ), form validation with React Hook Form and Yup, and address autofill from the postal code (ViaCEP API).

User Management Dashboard

2026 · test-react-five-lake.vercel.app

React, TypeScript, Redux Toolkit, React Query, MUI, Jest, Storybook

- CRUD dashboard delivered in 24 hours for a Junior React technical assessment, meeting every requirement and all 9 optional items; advanced to the interview stage.
- Caching and optimistic updates with React Query, tests with React Testing Library, CI on GitHub Actions, code splitting, accessibility and dark mode.

Other projects

github.com/Jportov

- **Flix API + Flix App** (Django REST Framework, JWT, Streamlit): movies and actors API with OpenAPI docs, consumed by a Streamlit front end.
- **PetShop** (JavaScript, Firebase): online store with an admin panel protected by Firebase Auth, product CRUD on Firestore and WhatsApp checkout.
- **Tomelis Rig Services** (Next.js, TypeScript, Nodemailer): company website with a contact form that sends email through an API route.

VOLUNTEER EXPERIENCE

Digital Literacy Workshops · University Extension Project, Anhanguera · Rio das Ostras, Brazil

- Planned and ran six workshops for a community association based on a survey of 30 residents; 24 of 27 enrolled participants completed them and email use among participants rose from 22% to 96%.

EDUCATION & LANGUAGES

- **B.Sc. in Software Engineering** · Anhanguera · 2025 to 2029 (in progress)
- **Full Stack Java Developer** · EBAC (British School of Creative Arts and Technology) · completed Oct 2024
- Courses: Django Master, Docker and AI Master (PycodeBR); Artificial Intelligence (EBAC)
